Laboratories

## Program

### Resident Satisfaction

All residents are happier and healthier when dog waste is out of the picture. You will no longer see it, smell it, or step in it.

### Environment

Keeping the grounds free of unscooped waste prevents harmful bacteria and microbes from entering the local water supply.

### Cleanliness

Unsightly dog waste is a thing of the past! The community will be free of unscooped waste and the grounds will be cleaner for guests.

### Our Staff

We will spend less time cleaning up after offending dog owners and more time taking care of your wants and needs.

### Safety

You, your pets, and your children will be safe from harmful bacteria in dog waste. You will not be exposed to the bacteria-ridden waste and risk illness.
