

Setting Up TDS Fiber Internet

We provide you with a modem from TDS. If there is not one in your apartment upon moving in, please call the office.

Step 1: Check that your modem (the black box mounted on a dining room wall) is on. The LED lights should be visible.

Step 2: To have wireless internet, you must purchase a wireless router. AC1700 router or higher is sufficient.

Step 3: Plug your router into the modem using an Ethernet cord. Follow the instructions provided with your router purchase box.

If you are unable to connect to the internet, please call TDS at 1-833-510-0303. Be prepared to provide the number listed on the modem.
